EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 7 to 9 which are non-elected without traverse. Accordingly, claims 7-9 have been cancelled.

REASON FOR ALLOWANCE

2. Djerf, and Alsman disclose various types of wheel for in-line skate comprising a hub composed of two halves each having an inner side face with multiple rods and an outer side face comprising curved webs that are flexible to absorb impact shock through the structure of the wheel, a plurality of apertures disposed about the outer rim to form a plurality of passageways through the outer rim of the assembled sections, a tire comprising a plurality of ribs molded on the outer surface of the outer rim. Tamer discloses a multipart hub assembly including a pair of hub members each having an annular inner rim portion, a web support portion including a conical shape inner side, a plurality of support webs on the outer side of the web support portion with an outside tire support portion, a plurality of ribs on the inner edge of the outside tire support portion. Piper et al disclose an in-line skate wheel having a shape foam core which cooperates with load bearing side walls to indicate the degrees of flexure of such walls in response

to loading from different direction. The wheel structure includes a polyurethane tire body which encapsulates a foam mandrel and a hub. However, none of the references of record suggests a wheel for in-like skate comprising a hub composed of two halves each having an inner side face and a conical outer side face, wherein the rods from one half are inserted into the indents of the other half and the segmented protrusions from one half are inserted into the cutouts of the other half and the assembly of the wheel is accomplished in the manner defined in the instant claim 1.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frantz F. Jules whose telephone number is (703) 308-8780. The examiner can normally be reached on Monday-Thursday and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph S. Morano can be reached on (703) 308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
